M. D. Golden Centre

The 8th. meeting of Council of the M. D. of Golden Centre No. 273, was held at N.E. 13 30-4, on Saturday, December 7, 1929.

Members all present except Councilor Jorgenson.

Minutes read and confirmed. Correspondence read and disposed of.

The Attorney General advised that a woman must be a resident at the time of her application to be entitled to allowance under the Mother's Allowance Act.

The Department of Municipal Affairs advised that Council should pay for moving fence around road diversion.

The Manitoba Co-operative Hay Growers Ltd., Winnipeg, and H. A. Dowler Ltd., Wetaskiwin, Alta., advertised hay and oats for sale.

G. A. Waldruff refused to act as Dept. Re. Officer in ward No. 3 and John Down was appointed in his place.

Mrs. O. Michaels was appointed Returning Officer at a fee of \$30.00 and Annual Meeting and Nomination is to be held at Golden Centre schoolhouse.

Taxes were struck off on cancelled and also the deficit in sale of Municipal land.

Financial Statement to November 30th. was read and accepted.

The following accounts were paid: Sedalia Hardware, hardware 2.35; Empire Lumber Co., culverts, ward No. 2, 14.00; Western Municipal News, 7 subs. to News, 6.00; Oyen News, notice, 1.30; Chapman-Slosser, premium on Sec-Tress bond; Richardson Road Machinery Co., freight on machinery 1.00; Fee and mileage meetings, R. Cates, 24.00; B. Morris, 24.00; P. C. Hoard, 28.00; Ed. Stewart, 34.40; John Dahl, 24.00 and A. Jorgenson, 15.30; Fee and mileage, road inspection, R. Cates, 42.45; B. Morris, 41.00; P. C. Hoard, 47.00; Ed. Stewart, 40.20; John Dahl, 44.00 and A. Jorgenson, 40.00; Mrs. O. Michaels, rent, 6.00; Ralph Greene, salary for November, 153.35, express on supplies, 75 and office expense, 10.00; Royal Bank, excise stamps, 10.00; George Hall ett, relief, 60.00; C. Caldwell, blacksmith account, 6.50; Empire Lumber Co., posts for New Bridgen Cemetery, 36.25 and culverts for ward No. 2, 28.00; Expense to Convention, R. Cates, 40.00, and B. Morris, 40.00; T. Middleton, moving fence, 8.00; Dr. Fizzell, amount due by J. E. Sykes, estate, 23.00; Dr. Esler, hospital account, due by Henry Clausen, 420.00.

Council adjourned to meet on Saturday, February 15, 1930 at Golden Centre Schoolhouse, at 9.00.

Ralph Greene, Sec.-Treas.

And Wash It In the Kitchen Sink We Suppose

An automobile that can be taken apart and parked in the kitchen has been invented by Engelbert Ziehlke of Berlin.

Although slightly under regulation size, the car can carry two passengers. The body is constructed of canvas. The garaging process of this little machine resemble the parts of a jigsaw puzzle. First, the body is detached and folded into a neat bundle; then the chassis is dismounted. Each piece that makes up the frame is numbered and fitted. Steering wheel and post, wheels, motor and body rods such are separate units.

The affair has three wheels and can be assembled in a few minutes.

Community Christmas Tree and Entertainment

The annual Christmas Tree and Entertainment, given under the auspices of Oyen United Church, will be held in Oyen Theatre on Monday, December 23. Members of The Sacred Heart and All Saints churches will assist on the program.

It is hoped that as many parents as possible will be present with their children, so that none of the little ones in the community are overlooked. A silver collection will be taken to help to defray the expense.

On the morning following the entertainment the tree will be re-decorated and displayed in Miller's store.

OBITUARY

Mrs. Guy R. Steeves

Died—At Vancouver, B.C., after a two month's illness Thursday, December 5, 1929, Mrs. Guy R. Steeves, second daughter of Mr. and Mrs. Robert Marsden of Exord. The funeral took place in Vancouver on Saturday, December 7.

The late Mrs. Steeves is survived by her husband and three small children.

With The Curlers

Last Friday evening Allan Sharp, skipping Ray Anderson's rink, and "Aberdeen" Angus Macfarlane, skipping the "Baldie" rink, were the contestants in the last rock attempted a twelve foot raise. The play looked perfect, but when the raised rock came to rest, it just failed to beat the shot rock and the game went to Allan Sharp and his crew.

The result of the President vs Vice-president series was President 52 Vice-president 60. Games in the first square draw are well under way and the ten is reported to be satisfactory.

WALL STREET IS HARD HIT BY MARKET SLUMP

New York. — A sudden flood of selling, striking with terrific impact in the last hour of trading, carried most of issues on the New York Stock Exchange down \$2 to \$22 a share.

It was the sharpest reaction since November 15, the low point reached in the October-November panic, when 420 issues crashed to new low levels for the year. Today's sales were only 1,054,860 shares, but nearly 2,000,000 of those changed hands in the final hour.

Wall Street attributed the selling to a combination of unfavorable developments. These included the publication of a statement by Roger Babson, well known economist, that the recent advance prices of stocks recovered 40 per cent. of the ground lost in the break, was only a rally in a major bear market; the resumption of heavy gold exports to Great Britain, and the announcement of a sharp increase in the stocks of refined copper.

Mr. Babson correctly predicted the October-November break a few days before it came, and said that his latest comment on the market naturally aroused widespread uneasiness among investors and speculators alike. He said that reports of bearish professionals, who are reported to have made known their intentions to attack the markets, also was regarded as an important factor.

To Protect Level Crossings

Board of Railway Commissioners Reserves Judgment After Investigation

Ottawa.—The Board of Railway Commissioners reserved judgment at the conclusion of its investigation into safety devices for level crossings. Producers of certain types of signals and automatic gates urged the board to require their product. They said that their product was used by representatives for the railway companies and that the wig-wag and bell was the best signal so far provided and should be left in use.

The very great importance which is placed on this hearing was indicated by the large number of representatives of various automobile associations, municipal bodies and provincial governments, as well as the many experts on behalf of the railways.

Arranging Trip To Orient

Plan Being Worked Out For Canadian Business Men

Montreal, Que.—A provisional itinerary for a businessmen's trip to the Orient next year, under the auspices of the Canadian Chamber of Commerce, has been issued by Dr. John W. Ross, chairman of the committee of the chamber. Dr. Ross will leave Vancouver on October 16, 1920, and will return to Canada on December 13. Dr. Ross stated that the chamber was collaborating with the Canadian legation in Tokyo, the Canadian Government legation in Shanghai, and the Japanese legation at Ottawa is working out the plans for the trip.

No Agreement Reached

Return Of Natural Resources To Alberta Still Undecided

Ottawa.—No agreement was reached at the conference between Premier Mackenzie King and members of the Dominion cabinet with Premier J. E. Brownie, premier of Alberta, on return of the natural resources to Alberta. At the conclusion of the conference which lasted for two hours, Premier Brownie said that the representations of Alberta had been made but would be put in written form and sent to the Dominion Government.

Another Grain Appeal Board

Brandon, Man.—Port William will soon have a grain appeal board, such as are established at Calgary and Edmonton, states Dr. A. MacGibbon, member of the Board of Grain Commissioners. Such a board will settle disputes over quality of grain, will shortly be established at the head of the lakes, he said.

Orders For Douglas Fir

London, England.—Orders for 200,000 railway sleepers of Canadian Douglas fir have been placed by the Great Western Railway Company. They will be used mainly in connection with the extension of work approved by the government under the employment Act of 1920, adding the unemployment situation.

W. N. U. 1216

Three Fighting For Earldom Of Egmont

Legal Battle To Prove Claim Opens In London

London, Eng.—A cowboy, a baker, and an politician opened their legal battle here to prove their conflicting claims to the Earldom of Egmont.

The cowboy is Frederick Joseph Trevelyan Percival, 36, for 25 years a rancher in Alberta, Canada.

The baker is James William Percival, 65, a resident of London, and the father of six children.

The politician is Robert Pownall, an old-age pensioner of Haydock, Lancashire.

Whoever wins the three-cornered fight will become Earl of Egmont, Baron Percival, Baron Arden and Baron Lovell and Holland. The value of the estates to which he will succeed is estimated at from \$500,000 to \$1,000,000.

The rival claimants to the Egmont title and fortune have searched the family records back to 1753, when the title was granted. In their attempt to find all blank pages in the Percival genealogical table and thus substantiate their individual claims, they have carried their investigations as far as Australia.

Three Perish In Arctic

Word Was Brought Out By Major L. T. Burwash

Ottawa, Ont.—News of the death of three natives of Scotland occurring in the Arctic was brought out by Major L. T. Burwash, of the Northwest Territories branch of the Department of the Interior, who arrived in Ottawa at the end of an 18-month trip, which took him along the northern coast of Canada from Adak to Boothia Peninsula.

Harold Lucas, of the Hudson's Bay Company, was swallowed up by the ice in the interior, while Oja Haves, Jan McKay Christie, also of the Hudson's Bay Company, died at Bathurst Post under similar circumstances to Boothia Peninsula.

Kader, engineer of the Parnam, Major Burwash's boat, had half carried and half dragged him across frozen wastes for 20 hours. Another man, recruited by the Hudson's Bay Company, from Scotland, died on Coronation wharf after he had broken through newly formed ice, over which he was walking. The freezing water gradually exhausted him.

Says All Are Insane

Dividing Line Between Sanity and Insanity Difficult To Detect

Windsor, Ont.—Everyone is insane, according to Dr. G. R. Cruickshank, government inspector in insanity for the past 20 years, in a statement made here recently in an explanation of the remark he made in Supreme Court at Sandwich, before Mr. Justice J. M. McEvoy, that over 1,000 insane people are in the custody of Windsor. There is no line of demarcation between sanity and insanity," said Dr. Cruickshank. "Some people are insane in the eyes of others, and yet might be regarded by the vast majority as being in full possession of their wits. It is often a matter to be decided by judges rather than doctors. There is no real distinction between sanity and insanity. Some of our most valuable citizens are 'cranks' and yet their work in life is very useful."

The doctor continued, however: "Some people, of course, had to have institutional care. We have to draw a line where we think that they will be benefited by such treatment."

Fort Chipewyan Gets Mail

Edmonton.—December 11 was mail day at Fort Chipewyan far up in the northeast corner of Alberta. Two planes of Commercial Airways, Ltd., made the 160 mile jump from Fort McMurray to Chipewyan on Lake Athabasca. They carried the first consignment, half a ton of air mail, under the Dominion plan, and sent letters to within the Arctic circle.

May Appoint Princess Mary

Victoria, B.C.—Intimation that Princess Mary is expected to be appointed Colonel-in-Chief of the 16th Canadian Scottish Regiment, at an early date, was given by Col. Cyrus Peck, V.C., in an address here in which he reviewed his recent visit to England to attend the banquet tendered holders of the Victoria Cross.

Was Well Known Merchant

Vancouver, B.C.—Charles Hamilton Carroll, aged 77, well known as a merchant in various parts of Saskatchewan and in the northwest, died at age, is dead here. Funeral services were held Dec. 12, with interment in Ocean View cemetery. He was born in Warwick, Lanark County, Ont.

Opposing U.S. Entry Into World Court

New Arrangement Does Not Satisfy Group in Senate

Washington, D.C.—Opposition to the new plan for United States entry into the World Court, as determined on that which met the original proposal for the admission of the Washington Government, is in the senate.

The group of senators that three years ago voted against the United States becoming allied with the international tribunal, even under the reservations then attached, is apparently as much dissatisfied with the new arrangement as it was with the old.

How much of a factor in the senate's final vote this opposition will be of course, remains to be determined, but notice has been given by the group, that the modification of the court's rules of procedure, affected in the new facilities of the United States entry, is unacceptable.

AUBURN PRISON RIOT QUELLED BY STATE TROOPS

Auburn, N.Y.—A beaten, sultry group of convicts saw the law enforced by their grasp control of Auburn prison, gained during the day at the cost of eight prisoners' lives and the death of the principal keeper.

The second attempt within five months of a chosen group of desperate men to gain their freedom in a prison break collapsed under the gunfire of three hundred bestigators. Holding absolute control of the prison at the outbreak of the trouble with Warden Edgar S. Jennings and seven guards in their hands as hostages, the convicts watched their plans go awry until night fall when their ring leaders fled and the survivors in the cells awaiting the search of state police.

The prison's principal keeper, George A. Durnford, died in an attempt to fight off the freedom in the inception of the riot.

The collapse of the convicts' plans brought about a concerted drive of the bestigators buried them from the south end gate into the south end cell block.

The first word of trouble reached Warden Jennings at 10 o'clock. He left his office, went to the kitchen to check the report and was seized at the door by a revolver in the hands of one of the three convicts, the warden approached three unsuspecting guards who were disarmed and proceeded to open the doors of the punishment cells. In a similar manner, other guards were captured.

The remark he made in Supreme Court at Sandwich, before Mr. Justice J. M. McEvoy, that over 1,000 insane people are in the custody of Windsor. There is no line of demarcation between sanity and insanity," said Dr. Cruickshank. "Some people are insane in the eyes of others, and yet might be regarded by the vast majority as being in full possession of their wits. It is often a matter to be decided by judges rather than doctors. There is no real distinction between sanity and insanity. Some of our most valuable citizens are 'cranks' and yet their work in life is very useful."

The doctor continued, however: "Some people, of course, had to have institutional care. We have to draw a line where we think that they will be benefited by such treatment."

Royal York Buys Champs

In order to ensure a full ladder for the coming festive season the Royal York Hotel has ordered the list of buyers at the Royal Winter Fair, Toronto, and secured the special carload lot of champions which was the subject of great sensation among cattle experts throughout the fair. This champion herd of fifteen hand picked steers, head and horned, was shipped from the Shorthorn class in southern Alberta, weighed in at slightly under 1200 lbs. apiece, and the head of the lot was the finest bull of best cattle ever to have been finished in Canada. It was shown in the above cut.

AMERICAN LEGATION SECRETARY

Ben Roeth Rigg, who has been officially announced, is to be first secretary to the American Legation at Ottawa. When Ambassador Phillips leaves this month, Mr. Rigg will act as charge d'affaires until new ambassador arrives.

Using Tractors On Desert

French and Chinese Scientists Conducting Expedition Without Guns

Peiping.—Gasoline-driven tractors are to replace camels on a desert expedition being organized by French and Chinese scientists to cover unexplored parts of North China and Indo-China next year. The purpose of the trip is to carry on scientific research and to be conducted jointly by the National Scientific Union of China and the Citroen Motor Car Company of France.

The Chinese expedition is to start from Peiping in February and plans to meet with the French explorers in the desert of the Gobi, where the brigade has crossed Russian Turkistan.

Takes Name Of Benefactor

Russian Youth, Follower Of Last War, Becomes Canadian Citizen

Barrie, Ont.—An 11-year-old Polish starved, died in filthy rags and broken by overwork, found his way to an encampment of Canadian soldiers at Soroka, Siberia, at the time of the Russian revolution, 12 years ago. (grown to manhood, John Petrosky, a Canadian citizen, took the name of George Harvey, the name of the Canadian soldier who had proved his principal friend in the old days and who had seen him established in Canada. George Harvey, the first, was in charge to corroborate Petrosky's strange story.

Goodwin Returns East

Last Member Of MacPaine Party Leaves For Home In Hamilton

The Pas, Man.—Don Goodwin, the last member of the lost and found MacPaine party to remain in the north, has left for his home in Hamilton, Ont., accompanied by Dr. Don Bruce, of The Pas, who has attended him ever since rescues took charge of the party at Cambridge Bay. Goodwin, suffering from frost bite when he arrived here, had three toes amputated and has been resting since the operation.

Are Close To Agreement

Alberta Hopes To Reach Settlement On Resources Question

Ottawa.—The Province of Alberta and the Dominion Government are close to an agreement as to the conditions for the return of the natural resources to the province. Premier J. E. Brownie and colleagues put forward recently, and Premier Brownie is negotiating in Ottawa, will have further conference with Prime Minister Mackenzie King.

Some time ago the Dominion government announced that on the basis of the finding of the commission which investigated the return of the natural resource to Manitoba, it was prepared to make a corresponding offer to the Province of Alberta. At the time it was explained that this meant that Alberta would get back its natural resources and the subsidy to that province from the Federal Government would be continued and increased as the population of the province increased.

The negotiations are not so simple as would appear on the surface. However, because Alberta finds herself in a very different position from what Manitoba was in, the negotiations in Alberta there are immense national parks, comprising some five million acres, said to be as much as all the other national parks of Canada put together. These parks include some valuable coal deposits. This requires special consideration.

Plan Additional Ships For Canadian Trade

Government Has Taken The Matter Under Consideration

Ottawa.—The Canadian Government has under consideration the establishment of several additional steamship services for the promotion of Canadian trade abroad. Hon. James Mahood, minister of Trade and Commerce, announced. This was an outcome of the success which followed the inauguration of the new government subsidized steamship service between British Columbia, ports and Australia. Tenders have been called for services from eastern Canadian ports to India, Ceylon and East Africa.

Japan Would Keep Subs

But Is Willing To Co-Operate In Arrangement

Victoria, B.C.—Kazuo Wakatsuki and Admiral Takabara, heading the Japanese delegation to the London disarmament conference, asserted that their country would go far toward reducing its naval force as any other power.

The party are on their way to Washington before proceeding to London for the conference, which starts next month.

The former premier said his country desired to keep submarines as a naval weapon.

LABOR PARTY IN BRITAIN FACING POSSIBLE DEFEAT

London, England.—Britain's Labor Government will be challenged in the House of Commons before Christmas on its unemployment policy, and it is in the minority by 30, there is a real possibility of defeat on the question of the major policy.

Details of the schemes so far produced by Right Hon. J. H. Thomas, Lord Privy Seal, have failed to give any satisfaction to the Opposition parties, and the huge figure of unemployment—1,202,900—despite opportunities of considerable employment before December 25—is contrasted with the Thomas plan which visualizes a year's work for only 180,200.

In this connection Premier Ramsay MacDonald has agreed to have the question of the Lord Privy Seal's salary debated in the Commons before Christmas, and this occasion will entitle the unemployment problem to be reviewed by all parties.

The Conservative and Liberal newspapers stress the inadequacy of Mr. Thomas' plans, although they sympathize with the tremendous task confronting him. The Conservatives are the most of the opposition to show that Labor cannot fulfill its election pledges, and the Liberals to demonstrate that Lloyd George's scheme as the only possible hope of solving the pressing problem of what to do with the hundreds of thousands without work.

Meanwhile pertinacious and persistent Empire crusaders are enrolling members of the public to pledge their names to support the Empire as the only way to overcome the present economic difficulties and distress.

BRITISH ARMY OF OCCUPATION LEAVES GERMANY

Wiesbaden, Germany.—Scenes reminiscent of the British occupation of the city were enacted here after the Union Jack had been hauled down from British headquarters and the last British soldiers had evacuated the Rhineland.

Residents of the city held their joy within bounds until after the troops were on their way. Then they cut loose. Strangers meeting in the streets clapped hands in congratulatory and the safes were jammed with celebrators who continuously toasted each other and the Fatherland.

The Union Jack came down from its staff over the Hotel Hohenzollern at 2 o'clock this afternoon. At the same hour another small British detachment was leaving Bingen-on-the-Rhine.

Here in Wiesbaden the company of British soldiers mounted guard at the approach of the color-bearers and the detachment then passed in review before Lieut-General Sir William Thwaites, British commander for the last time on German soil.

There was a long roll from the drums and the military band struck of "God Save the King" as the British flag fluttered down from the staff. Then the troops wheeled into columns and marched to the station where they embarked at 3:30 p.m.

Besides General Thwaites and his staff the ceremony was watched by General Sir John Dill, commander of the French troops in the Rhineland, and his chief of staff. A detachment of French cavalry was drawn up before the railway station.

Sir William held a farewell reception in the drawing room of the station, and gave farewell to his French guests of honor. The only British official remaining in the Rhineland is William Keble, British high commissioner on the inter-allied Rhineland high commission since 1923. He will remain in Germany until termination of all occupation of the third zone.

With the departure of the last British garrison the number of allied troops in the Rhineland has been decreased within a few months by 25,000.

Market For B.C. Timber

Vancouver Business Men Say For Antipodes To Study Markets

Vancouver.—There should be greater markets in Australia and New Zealand for British Columbia lumber products was stated recently by four Vancouver business men who called for the Antipodes on hard the "Acorn". They are J. G. Robin, T. H. McLeod, R. Andrews, and J. H. McDonald.

The four will study Australian and New Zealand requirements, will address various organizations, and will advise business and government heads and make extensive investigations.

Protest From Britishers

Resent German Practice Of "Dumping" Cereals Into Old Land

London, England.—The British foreign office should make representations to the government of Germany to stop the practice of "dumping" cereals into Great Britain, urged the agricultural committee of the conservative parliamentary party, meeting in the parliament buildings to consider the importations of cereals from Germany under the bounty system. The importation in large quantities was a breach of the spirit, it was said, of the terms of the 1914-1918 trade agreements, and the committee added that the committee added.

An Important Decision

Judge Laid R.C.M.P. Have Authority To Enforce Provincial Law

The Pas, Man.—Royal Canadian Mounted Police have the authority to enforce provincial law as well as federal statutes, according to a decision handed down here by Judge A. L. Bonyeat, of Dauphin judicial district. The decision upholding a judgment by Magistrate J. Blyard.

The case arose out of a claim by defendant that a mounted police officer did not have the right to stop a motor vehicle.

Open Soup Kitchens

Montreal, Que.—The Montreal Star, in cooperation of the Canadian Pacific Railway, announce the opening of special soup kitchens for the unemployed during the winter months. The meals are to be entirely free.

Grows Championship Wheat In a District Supposed To Be Unsuitable For Farming

To win the world's championship for hard spring wheat is no small achievement in these days of world champion growers, but to grow wheat in a district that was supposed to be unsuitable for wheat growing is a feat that people years ago led to impossible. It is a fact that was duplicated since world championships for wheat were first established. Yet such is the experience of J. H. B. Smith, a farmer living at Wolf Creek, east of Edson, on the main line of the Canadian National Railways.

The experience of Mr. Smith is in many respects similar to that of other men who have brought this coveted honor to western Canada. Coming from Leicester, England, in 1907, he engaged in several pursuits before he took up a homestead in the Wolf Creek district, in 1913, when the country was just opening up. While farming was not his profession, he soon began to show signs of a successful exhibitor. The following year he took three first prizes at the Edson Agr cultural fair for wheat, oats and potatoes. In 1915 he sent his first exhibit to Edmonton and won second place for oats, but it was not until 1920, that he began to tackle the world show at Chicago. In his first attempt he took 15th place with oats. In 1924, he took 15th place with Marquis wheat and he was shown every year since 1920, with the exception of one year when his crop was hoisted out.

Behind the exhibits he has been sent to Chicago he has been among the list of successful exhibitors at Canadian fairs for years, and has been gradually climbing up to one of the most consistent growers in the province. Some years ago Mr. Smith began to grow wheat in the Wolf Creek district, in 1913, when he was in up to of opposition he pined his faith to the new Howard wheat, which he claimed would eventually bring the championship to him. He has stuck fast to this faith, tended his plots with painstaking care, and for three years his labors were rewarded with such a fine crop that he felt satisfied to send it to Chicago, declaring as he did so, that the wheat that would beat it had not been grown.

Floor Of Atlantic Shiffs

Earthquake Along Eastern Coast On November 18 Causes Submarine Uplift

That the bed of the North Atlantic was lifted as a result of the earthquake of November 18, was indicated at Halifax in reports from cable ships assigned to the task of repairing the submerged cables. Scandiums showed that the floor of the ocean had been moved and that fishing banks had shifted as a result of the disturbance. Breaks in the cables connecting the old world with the new have been plotted over an area 400 miles south and 300 miles northeast of Halifax. In some cases several breaks occurred in the same cable over a distance of 100 miles.

World's Smallest Engine

Among the exhibits at the recent Model Eng'ners' Exhibition in London, England, was a horizontal engine so small that it is almost impossible to see the working parts in motion without a magnifying glass. It is only a quarter of an inch long and is worked by compressed air. A hair from the head of the wife of the model-maker forms the driving belt.

Trees In Waterton Lakes Park

The alpine larch, one of the most beautiful of mountain trees, gives a special grace to many a high pass in Waterton Lakes National Park, Alberta. This tree grows in the last belt approaching timber line. The other principal trees in this Dominion park are poplar, lodgepole pine, white-barked pine, Douglas fir, alpine fir, and Engelmann spruce.

"What is this overtime you are claiming?"
"The evening you invited me to dine with you."—Wahne Jackson, Berlin.

W. N. U. 1318

SWINE CLUB CHAMPIONS OF CANADA

Two brothers, Lindsey and Gordon Weir, of Prince Albert, Saskatchewan, who won the Dominion Championship, in twice club work at the Royal Winter Fair, Toronto, recently. The two boys are shown with W. D. Robb, Vice-President of the Canadian National Railways, who donated for annual competition the Robb Trophy, which carries with it the Dominion Championship. For the second year this trophy goes to Prince Albert; last year two girls from this district received the honor.

Alberta-Saskatchewan Boundary

Follows Straight Line For Nearly 700 Miles and Is Longest Surveyed Straight Line

The boundary between Alberta and Saskatchewan is the Fourth Meridian of the Dominion Lands survey system, which co-ordinates approximately with the 116th meridian of west longitude and under instructions from the Surveyor General, Department of the Interior, has been surveyed from the International Boundary northward to Lake Athabasca, a distance in a straight line of nearly seven hundred miles, constituting one of the longest surveyed straight lines in the world.

Amenities In Politics

Kind Words Of Mr. Hon. Stanley Baldwin To Premier MacDonald

In the British parliament on Wednesday, the Rt. Hon. Stanley Baldwin, Conservative leader, congratulated Premier MacDonald on his visit to the United States and said that he himself had desired to visit the republic as prime minister.

"But there is no feeling of regret or envy in my heart," said Mr. Baldwin. "I rejoice it has been done, and am happy it has fallen to the right honorable gentleman to do it. I hope it will not be the last time."—Toronto Star.

FASHION

No. 153 — Particularly Pleasing. This style is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure. Size 36 requires 3 yards of 36-inch material with 5/8 yard of 36-inch contrast for waist.

No. 156 — Typically Feminine. This style is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure. Size 36 requires 3 1/2 yards of 40-inch material for separate vest.

No. 360 — Good Taste. This style is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure. Size 36 requires 3 1/2 yards of 40-inch material with 2 1/2 yards of 32-inch lace.

No. 361 — Couples Adult Model. This style is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure. Size 36 requires 2 1/2 yards of 40-inch material.

Emb. No. 11093 — Flower Basket and Pattern Sprays. Pattern contains 11 rights and 12 lefts. 7 inches high by 9 inches wide, two rights and two lefts 11 1/2 inches long, ten rights and ten lefts 1 1/2 inches long (blue).

All patterns 25 cents in stamps or cash (post preferred). Wrap cut carefully.

Canadian Emigration To U. S. Is Slowing Down and Tide Appears To Have Turned

Sunflower Silage Good For Young Sheep

Proves Better Food Than Mixture Of Oats, Peas and Vetches

Silage from sunflowers proved a better succulent food than silage made from a mixture of oats, peas and vetches, for the wintering of young sheep at the Northern Ontario Experimental Station. For six years feeding tests were carried on during the winter months with lambs born the previous spring. The ration of other foods was exactly the same for thirty-day periods each year. During the first five years of the test the ration given to each lamb consisted of silage, one pound, clover, hay, two pounds, and grain, one-half pound per day. In 1925, however, the amount of silage fed was determined by the percentage of dry matter which it contained. The oats, peas and vetches silage, having been found to contain less moisture, was afterwards fed at the rate of a pound per day, while the sunflower silage was fed at the rate of one and one-half pounds for each lamb. The grain mixture used was composed of whole oats three parts, bran one part by weight, plus five per cent. of oil cake. The average daily gain per sheep for the thirty-day period was 22.5 of a pound by those fed on sunflower silage, and 38 of a pound made by those receiving the oats, peas and vetches silage. The feed cost to produce one hundred pounds of gain also showed the sunflower silage to be the better food, as the cost per one hundred pounds of gain was \$14.44 for the sunflower feed, and \$18.08 for the others. The experiment is described and the results given in the report of the superintendent of the experimental station at Kemptville, Ontario, published by the Department of Agriculture, at Ottawa.

Wholesale movement of the cleverest and most enterprising of Canadian sons to the United States, attracted by the glamour of riches in the larger American cities has dropped considerably.

Correspondingly the influx of Americans into Canada has increased, and leaders of both countries are considering the significance of the change.

Wesley Frost, United States consul-general, at Montreal, states in commenting on the change:

"Canadian emigration has slowed down of its own accord, and the tide appears definitely to have turned. Our consular records confirm this, since a large share of Europeans in Canada for the past few years, are now declining the opportunity to cross the American border, when their turns are reached."

"Canada's development will certainly now for a time be more rapid than that of the United States and the balance of power in the world will be shifted. Canada's development will certainly now for a time be more rapid than that of the United States and the balance of power in the world will be shifted."

"Canada's development will certainly now for a time be more rapid than that of the United States and the balance of power in the world will be shifted."

New Human Disease

Caught From Rabbit

Wear Rubber Gloves When Dressing Wild Rabbit, Doctors Say

Never eat a rabbit that you can kill with a club, say the physicians of the U. S. Department of Health, in a statement issued at Syracuse, N.Y., recently. And Tularaemia, the disease that slows down the rabbit, can kill the hunter, for a pocketing to American statistics, out of 20 cases, 17 have ended fatally. Thus the mortality is about 4 per cent.

Generally the infection comes from dressing the animal, the germ entering the human hand through an abrasion, at the point of which an ulcer is raised. The onset of the disease is sudden, often occurring while the patient is at work, and is characterized by headache, nausea, chills, extreme perspiration, body pains, prostration and fever. The latter symptom is always present and continues for two or three days.

Tularaemia, so named because it was discovered in a ground squirrel in Tulare County, California, is caused by a germ, Bacterium Tularensis. Cases of the disease among humans have been reported from all parts of the States, excepting New England. Rabbit meat thoroughly cooked, however, is harmless since a temperature of 133 degrees Fahrenheit kills the Tularaemia germs.

Cresting Fence Posts

Fence Posts Of Poplar Properly Treated, Last For Years

At the Dominion Forest nursery, maintained by the Forest Service, Department of the Interior, at Indian Head, Saskatchewan, fence-posts of poplar, creosoted, have lasted from 1917 to the present and are still sound. Untreated posts, on the other hand, have rotted out in two or three years. Efforts are now being made to devise an apparatus for treating posts which will enable any farmer to set up a simple home treating plant at small expense.

Begin's Building Increases

Building permits issued in Regina from January 31 to October 31 amount to \$9,445,729, as compared with \$6,146,010 for the corresponding period of last year.

Canadians own about 60 per cent. of the securities of all the enterprises on Canadian soil.

The Singing Fool

By HUBERT DALL
Copyright, 1925, Warner Bros. Pictures, Inc.

SYNOPSIS

At Stone, singing waiter at Blackie's New York night club, is loved by Grace Farrell, the cigarette girl, but he doesn't know it. He marries Molly Winston, a ballet singer, and wins fame as a composer of popular songs. His wife, Molly, dies two years old. Molly's cousin, Lydia, is married to Al, a waiter at Blackie's. Grace and Perry take the child Al and sail for France. Al, broken by the loss of his mother, drifts into Blackie's place at night, where Grace Farrell, who still loves him, shames him into the promise to stage a musical. They leave the club together shortly after midnight as they reach the Al stage.

CHAPTER XXVI

"What's the matter?" Grace asked anxiously.

"It's just the effect of coming suddenly into the sunlight after I have been in the dark. I'm not quite sure of myself and my directions. And I look so terrible down-out in this bright daylight."

It was true, Al's appearance was pitifully wretched, but Grace dismissed that.

"Well soon fix everything," she said confidently. "And Al—"

"If I'm to help you, you must give me your full confidence—tell where you live, and promise not to run away again."

"I will, Grace," Al answered eagerly, in the tone of a child who would desperately do anything for a good impression. "I'll promise."

Grace smiled in spite of her attempt to appear a little stern.

"Well, then, come along."

As they stroled along the sunlit streets, with Grace occasionally sending a happy glance up into Al's face, she could not help but realize how their positions were reversed from when she had first met him. Then she had been a frightened child, full of grief, generous Al had protected her from the rowdy customers at Blackie's place. Now she was almost leading that same man as if he were a child, protecting him, and encouraging him constantly. Her heart was ready to burst with pride and love.

"Where do you live?" she asked.

"It's over there," said Al, vaguely indicating the East Side. "You know"—he paused irresolutely—"I hate for you to walk over there. It's such a dump. Just a rickety, cheap hotel—almost like a flophouse."

"It's not really matter to me," said Grace quickly, "but you'll rather go home alone, all right. Only I don't want I care about your clothes or where you live, or anything like that. I just care about you."

There was no mistaking the look that came into Grace's eyes. Al realized at last that she loved him. He felt as if he were being pulled at it—how could she love a down-and-out like him? He felt a rapid thrill under his dilapidated vest, an emotion he had not known for a long time. He wanted to put his arms about her, to tell her how much she meant to him, but he held back.

back. "This was neither the time nor the place."

"Before you go home," suggested Grace, "walk over to the Square with me. I live here there. We can sit at a bench and talk for a while. It will be good for you."

Al nodded. Presently they emerged from the canyons of streets to walk wide green expanse of Washington Square.

"See how beautiful it is," said Grace. "I thought it would make you feel better. The leaves are turning red and yellow. And see how nice the green grass looks passing under the trees. Here, we'll try this bench."

Al sat down and relaxed, his eyes half closed. The autumnal morning sunlight slanted down from between two skyscrapers, spreading fan-shape across the level expanse and lighting the white arch. Italian slum children played on the south side, while in the northern part of the Square the children of the Irish laddled about, under the watchful eyes of nurses.

"You say you live near here?" Al asked finally.

"Yes, just around the corner on Waverley Place. I have a room."

"Oh yes." Some hint of Grace's radiant blush and happy life suddenly came home to Al in that one sentence—"I have a room." She had a room but had thousands of other girls in the metropolis who had no real home, no family, nothing much but dreams. Yet she lived bravely and without murmur, and Al, while he listened, felt the sentence remained unfinished.

He rose. "Grace, you're the wonderful girl in the world. I know it at last. We'll talk a great deal about that later. But now you must go home and get some sleep. I'll write you later—I'll see you tonight at Blackie's."

Grace stood before him, eyes glowing. "Thank you, Al," she whispered, "I'll be waiting for you. Suddenly he leaned over and kissed it."

"My little one, it's I who should do the kissing and be kissed. You are my girl, my girl."

"You just say a different place in your girl's garments. And later—"

Technically the place is feasible, say the engineers. They do not, however, attempt to forecast how the legal problem of dividing the land among England, Belgium, Holland, Denmark and Germany would be solved.

The project contemplates a huge dam some 500 miles long from off Spurn Head, England, to the northern end of Denmark, and another dam across the English Channel from Dover to Calais. It is figured that the dam will cost \$200,000,000.

ber. Was Al going to fall here; would he prove up to make the comeback after all her effort? She drew the thought resolutely from her.

(To Be Continued.)

Child Slavery In China

Authorities Find It Very Difficult To Eradicate Situation

In connection with the introduction of a bill into the Hong Kong legislature for the abolition of the "mut sui" system, whereby little girls are sold into domestic slavery, it was said recently that the system could not be done away with by legislation, but required the education of public opinion.

In effect this was the explanation of the failure of the British Government to wipe out this blot. Forty years ago Lord Kimberley, then governor of the colony, found that while by law there was no slavery, in practice it existed. From then onwards there have been constant protests against the practice.

By religion and tradition it was customary to "adopt" children as the companions of the wealthy or even as servants. Certain money passed, but this was only as a form of compensation. In some ways, it was argued, the children were better off than the poor owners as they often came from poor homes. However, it is common knowledge that these children were, and still are, sold into slavery.

They are used as domestic servants as drudges, and even employed for worse purposes.

Big Project Being Planned

Engineers Discuss Reclaiming Vast Sections of Submerged Land

A project for reclaiming a vast section of Europe capable of supporting 20,000,000 people, which sank into the North Sea in 1900, will be carried out by engineers. If ever materialized its sponsor believe the scheme would go far towards solving Europe's population problem.

Technically the plan is feasible, say the engineers. They do not, however, attempt to forecast how the legal problem of dividing the land among England, Belgium, Holland, Denmark and Germany would be solved.

MADE BY THE BAKERS OF

Thousands Years Old

Zipper Supposed To Be Modern Invention Used By Vikings

Bobbed hair was the fashion 1,000 years ago, and the Vikings had already invented a "zipper." This interesting fact, together with many others of greater scientific importance, have been established through the discovery near Tilist, East Prussia, of a great Viking burial place, dating from the ninth, tenth and eleventh centuries.

There were eight graves, and these are but a small part of the total. The finds are unusually rich. Each metal grave contains three or four iron swords, as many as a dozen lance heads and knives, bronze belt buckles, stirrups and stirrings.

The women's graves also contain bronze bracelets, rings, necklaces, cleverly worked brooches and headbands.

In one of these graves a young woman with bobbed hair was found, as also "zippers," which were used in place of buttons or pins to secure garments.

The finds will be placed in the Prussia Museum, in Königsberg.

WHEN YOUR BABY CATCHES A COLD

In spite of all precautions little ones will take cold—especially during the changeable days of our Fall season. When the first symptoms appear—sneezing, redness of the eyes, running nose—Hwy's Baby Tablets should be used.

They will rapidly break up the cold and prevent more serious complications. Mothers who keep a box of Baby's Own Tablets in the home always feel safe. In fact they are like having a doctor in the house. They are gentle but thorough laxative that sweeten the stomach and soothe the bowels, thus driving out constipation and relieving the baby.

One of the many childhood ailments which are the direct result of a clogged condition of the bowels or sour stomach. They are absolutely safe—being guaranteed to leave no harmful residue, even to the youngest babe. They are absolutely safe—being guaranteed to leave no harmful residue, even to the youngest babe.

If Your Furnace is Your Tyrant Let Us Free You

WHY slave day after day throughout the winter trying to force your furnace to comfortably heat your home when a two to three-inch layer of DRY INSULEX placed between the attic floor joists will—cut down heat waste—save fuel—and insure a warmer home?

DRY INSULEX is a light, fluffy, fire and vermin-proof product of Gypsum that forms an effective barrier against heat loss through the ceiling. It can be quickly applied by yourself without mess or fuss.

See us to-day and arrange to reduce this winter's fuel bill and add to the comfort of your home.

Canadian National through trains pass through a territory replete with scenic grandeur, of historical and educational value to the traveller. On its trains will be found companionable jolly and likable—an infectious air of friendliness and good fellowship. There is nothing superior to the Canadian National sleeping and dining car service. Radio-receiving service is an added feature on the through trains.

Any Agent of the Canadian National will be glad to quote lowest fares and arrange all the details of the trip—or write

THE OYEN NEWS

About Town and Country

Mr. and Mrs. H. E. Briley left last Sunday for Mulvane, Kan., where they will spend the next three months.

Mr. Roy Notman, who has been on the staff at the Red Sentry Garage all summer, left last Thursday for Craigmyle, to work for Mr. Delsing, the Chevrolet dealer at that town.

Mrs. J. C. Desso of Oyen, and Mrs. Thornton Ford of Benton, left last Monday en route to Minneapolis, Minn., to visit relatives.

The Womens Guild of All Saints Church, will give a whist drive and dance in the Masonic Hall, Oyen, on Friday, January 10, commencing at 8 o'clock. Admission 75 cents.

Mr. Chas. L. Wilson, who has been in Oyen hospital for the last six and a half weeks, was moved to the home of his daughter, Mrs. Chas. L. Dunford, last Thursday. His many friends will be glad to know he is making satisfactory progress.

Mr. Thos. Lees, who was a Calgary visitor last week, returned to Oyen Saturday.

Work at the United Church is delayed awaiting the completion of the plastering.

A town in the Straits Settlements, aroused by the increasing night collisions between automobiles and the older type of transportation by elephant power, has passed an ordinance requiring elephants, while travelling on the highway at night, to wear a tall light.

Lawrence Heath had the misfortune to break his thumb yesterday while working on the derrick at Fuego No. 2, and was brought into town last night to receive treatment.

Work At Fuego

The new derrick at Fuego No. 2 is now about half-way up. Casing for No. 1 well is en route and after arrival will be used during the first favorable break in the weather.

IN LIGHTER VEIN

In other days one was cautioned to save for a rainy day. Modern youth saves for a wet night.

The demure young bride, a trifle pale, her lips set in a tremulous smile, slowly stepped down the long church aisle, clinging to the arm of her father.

As she reached the low platform before the altar, her slippered foot brushed a potted flower upsetting it. She looked at the spilled dirt gravely, and then raised her childlike eyes to the serene face of the old minister.

"That's a bit of a place to put a flower pot," she said.

The province of Nova Scotia is on the threshold of a period of unprecedented development, judging from the record business being handled during the current year by the Canadian Atlantic Railway, and the scope of the preparations now under way for the development of tourist traffic," says George E. Graham, vice-president and general manager of the railway, in a recent interview.

Total amount of life insurance carried by the people of Canada is at present about \$5,500,000,000 or approximately \$600 for every man, woman and child in the Dominion. The United States with \$750 per head of population is the only country in the world that exceeds Canada in the amount of life insurance carried.

Notice is hereby given that I will close the Oyen Hospital, on December 31, 1930.

Dr. R. S. McGregor.

Dr. T. F. Holt, dentist will be leaving town early in the New Year for several months. Any-one requiring dental work, should have same done as early as possible before he leaves.

A call is made for clothing and toys, to be used loosely, for those who need and the balance sent to The Sunshine Club, Calgary. Kindly leave parcels at S. A. Miller's store not later than Saturday.

The lowest point in the past week's cold snap was reached last night when the thermometer registered 20 below zero, and remained there through the night.

A FLOATING MASTERPIECE

Five famous British artists are contributing to the decorative scheme of the new Canadian Pacific 42,000-ton liner "Empress of Britain" now being built on the Clyde. Frank Brangwyn, R.A., is designing the dining saloon; Sir John Lavery, R.A., the Ball Room; Edmund Dulac, the Smoking Room; W. Heath Robinson, the Cocktail Bar; and Sir Charles Allom, the First Class Lounge. The "Empress of Britain" will be one of the world's largest ships and will ply the St. Lawrence River route between Southampton and Quebec. She will be the largest ship between Europe and Canada. Her speed is still a mystery but will probably be around 24 knots, enabling her to make the trip in five days. She is due to be launched early next summer and will be in service in 1931. Our shows vessel in advanced stage of construction.
